DEBRIEFING – EXERCISE DEPLOYMENT

Safety:
What safety issues were not identified or could be managed more effectively? None
Equipment Deployment:
How could we have improved the equipment deployment portion of the exercise? Water was too rough to deploy the boats. Water gate dam/training trailer were deployed fine and was very well organized part of the exercise. No concerns.
Equipment Deficiencies:
What equipment deficiencies did you see? None
Communications:
How can we improve communications? (ie: was the sound acceptable? were directions clear?) Communications were good
Training Effectiveness / Exercise Improvement:
How can we make these exercises more effective? Exercise was effective and very informative
Lessons Learned:
What were the lessons learned? Take spills seriously, even the small ones. What could seem small, could turn into a large spill fast. What could be a potentially inexpensive spill could become astronomical. What could potentially cause little damage to the environment could cause significant damage.
Other Types of Training:
What other types of co-op exercises would you like to see?

Western Canadian Spill Services Ltd.

Other Equipment Needed in this Area:

What additional equipment would be beneficial to this co-op area?

None stated

DEBRIEFING – CLASSROOM EXERCISE

Training Usefulness:

Was the training of use to you? (show of hands – approximate percentage)

100%

Course Material:

What else could be included in this course to improve the effectiveness (ie: topics, training material, sequence of information, more case studies, etc)?

None stated

Instructor:

How can a WCSS instructor be more effective in delivering this course?

Nothing reported. Participants felt that the instructor was very informative and engaging.

Training Application:

What information did you learn today that will apply to your daily job?

If you see a spill deal with it immediately, even if you know its not your own companies. IE: inform appropriate people immediately to avoid further damage

General Comments:

What other comments do you have that can help us to improve this course (ie: timing, location, etc)?

none

Spill Medium:

Was Spill Medium used for the exercise?	Yes		No	X
---	-----	--	----	----------

Control Point Evaluation:

Recommendations:	
------------------	--

RECOMMENDATIONS - WCSS EQUIPMENT:	
Equipment Used: Training Trailer Watergate Dam	Short morning classroom session reviewing booklet Oil Spill Cooperative Training Exercise then Dryland training with Training Trailer and Watergate Dams. Boats were not deployed due to rough water conditions.

Equipment Deficiencies	Follow-Up (Identify Responsibilities)

Debriefing Suggestions:
