# SPILL REPORT FORM

## 2.1

### Action

*Obtain and record incident reporting information.*

### Procedure

*1. Name of person reporting the incident*

Name	
Telephone	
Cellular	
Day/Month/Year	
Time of report	
Location of person reporting	

*2. Person completing this form:*

Name	
Telephone	
Cellular	
Email address	

**3. Identify responsible party**

<b>Name of company that has the incident</b>	
<b>Company contact name (24 hr)</b>	
<b>Contact telephone number</b>	
<b>Cellular telephone number</b>	
<b>Email address for contact</b>	
<b>Location of contact</b>	

Other: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

*Obtain incident information*

<b>Date release was discovered</b>	
<b>Time of discovery</b>	
<b>Estimated time of release</b>	
<b>Cause of release</b>	
<b>Type of substance released</b>	
<b>Quantity of substance released (barrels)</b>	
<b>Location of release</b>	
<b>General description of surrounding area</b>	
<b>Describe extent of the area impacted by the spill (approximate dimensions)</b>	
<b>If spill is in surface water what is the name of the lake, river or stream</b>	

Is the health or safety of any individual (residents, communities, etc.) being compromised?

- Yes
- No

If Yes describe:

Is the property at risk or being damaged?

- Yes
- No

If Yes describe:

What types of land uses are impacted by the incident?

What are the obvious impacts to the environment (ie: wildfire, water pollution, wildlife, air quality, vegetation damage, surface disturbance, other:

Other relevant information:

**Action**

*Document other parties notified / involved in the spill.*

**Procedure**

*List names and contact information for other regulatory agencies that have been notified:*

<b>Agency</b>	<b>Contact (telephone, cell, email)</b>	<b>Date and Time</b>	<b>Requests from Agency</b>

**List names and contact information for regulatory personnel on-site:**

<b>Agency</b>	<b>Contact (telephone, cell, email)</b>	<b>When arrived or expected</b>	<b>Requests from Representative</b>

List others that have been notified of the incident:

<b>Name</b>			
<b>Company</b>			
<b>Contact Information</b>			

*Outline details of actions taken to date.*

*Utilize the following checklist and provide a general summary of actions taken to date:*

**Initial Actions**

<input type="checkbox"/> <b>Implement the emergency response plan(s)</b>
<input type="checkbox"/> <b>Shut-in the spill source</b>
<input type="checkbox"/> <b>Identify level of emergency</b>
<input type="checkbox"/> <b>Report the spill (internal, regulators, public)</b>
<input type="checkbox"/> <b>Dispatch Spill Responders</b>
<input type="checkbox"/> <b>Evacuate people if necessary (identify when / where)</b>
<input type="checkbox"/> <b>Dispatch equipment (type, estimated time of arrival)</b>

<input type="checkbox"/> Identify staging area (if yes; location)
<input type="checkbox"/> Identify on-site command post location
<input type="checkbox"/> Control point description
<input type="checkbox"/> Identify spill perimeter
<input type="checkbox"/> Conduct hazard assessment
<input type="checkbox"/> Identify safety controls
<input type="checkbox"/> Containment steps to date
<input type="checkbox"/> Other actions

**Meeting with regulators scheduled:**

<b>Agency / Company</b>			
<b>Representative</b>			
<b>Contact Information</b>			
<b>Date</b>			
<b>Time</b>			
<b>Location</b>			

**Action**

*Outline details of future actions that are anticipated.*

**Procedure**

*Utilize the following checklist and provide an overview of anticipated future actions:*

**Complete a situation analysis**

**Develop an Incident Command System**

**Conduct a detailed hazard assessment**

**Develop an Incident Safety Plan**

**Develop an Incident Action Plan**

**Identify emergency operations centre**

**Initiate containment and recovery**

**Identify decontamination issues**

**Identify waste management issues**

**Develop a Communications Plan**

**Schedule public information meetings**

**Identify subject matter experts that will be involved**

**Identify specialized equipment that will likely be required**

**Other anticipated future actions**

*Determine the level of emergency.*

Criteria	Emergency Level			
	Alert: Minimal	Level 1: Low	Level 2: Medium	Level 3: High
Risk Control	Immediate control of hazard, with progressive resolution of the situation.	Immediate control of hazard is becoming progressively more complex because of deteriorating conditions.	Imminent and/or intermittent control of the hazard is possible.	Imminent control of the hazard is not possible.
Containment	Control and relief systems functioning correctly.	Control and relief systems functioning correctly.	Some control and/or relief systems not operational.	Key control and relief systems not operational.
Impact Public/worker safety	On-site only.	On-site, with possible impact off-site.	On-site, with possible impact off-site.	Potential for public safety to be jeopardized.
Environment	On-site only	On-site, with some potential off site. Minor or short term.	On-site, with some off site. Minor or short term.	On-site, with significant off site. Long term.

## Action

**Determine possible response for specified incidents.**

## Procedure

		Emergency Level			
		Alert:	Level 1: Low	Level 2: Medium	Level 3: High
<b>Communications</b>					
Internal	Discretionary, depending on company policy.	Discretionary, depending on company policy.	Immediate notification of off site management.	Immediate notification of off-site management.	
External public	Courtesy at company discretion.	Mandatory for individuals within the EPZ requiring notification.	Planned and instructive as per the specific ERP.	Immediate multi-agency (operator, municipal, provincial, or federal) response.	
Media	Reactive, as required.	Reactive, as required.	Proactive media management to local or regional interest.	Proactive media management to national interest.	
Government	Notify AER if public contacted.	Notify AER and local authority, if required for initial response.	Notify AER and local authority.	Notify AER and local authority.	
<b>Actions</b>					
Internal	On-site, as required by company.	On-site, as required by company. Initial response undertaken in accordance with the specific or corporate-level ERP.	Predetermined public safety actions are under way. Corporate management team alerted and may be appropriately engaged to support on-scene responders.	Full implementation of emergency management system.	
External	On-site, as required by company.	On-site, as required by company.	Potential for multi-agency (operator, municipal, provincial, or federal) response.	Immediate multi-agency (operator, municipal, provincial, or federal) response.	
<b>Resources</b>					
Internal	Immediate and local. No additional personnel required.	Establish what resources would be required.	Limited supplemental resources or personnel required.	Significant incremental resources required.

## EMERGENCY SERVICES

- Determine your location using, exact legal land description, place name or GPS coordinates.  
LSD\_\_\_\_ Sec\_\_\_\_ Twp\_\_\_\_ Rge\_\_\_\_ W\_\_\_\_M

Coordinates: \_\_\_\_\_  
\_\_\_\_\_

- If emergency medical care is required, call 911 immediately.
- If the medical emergency occurs outside of the local 911 service area or in a remote area or you are at a STARS Emergency Link Centre (ELC) registered site, contact the ELC at 1 (888) 888-4567 (or \*4567 on cellular). The STARS Emergency Link Centre allows:
- Pre-registration of remote sites such as spill sites for assistance with emergency response if required.
  - Coordination of medical, search and rescue, ground ambulance, RCMP, helicopter and airplane emergency response.
  - Coordination with ground and air ambulance dispatch for ground ambulance, fixed wing or helicopter support.
  - Coordination with emergency services for direct scene call helicopter response or ground ambulance meeting the helicopter on the highway.
  - Site registration can be done by contacting the STARS Emergency Link Centre at 1-888-888-4567 or by email at [industry@stars.ca](mailto:industry@stars.ca).

# LOCAL RESOURCES – SPILL EQUIPMENT

- Identify equipment that is available locally from the following list.
- Complete the table below on receipt of this manual.

- |                           |                                |                               |
|---------------------------|--------------------------------|-------------------------------|
| - Airpacks                | - Hardware                     | - Safety Supplies             |
| - ATV's                   | - Helicopters                  | - Shelters                    |
| - Backhoes                | - Highway Trucks               | - Sorbents                    |
| - Bed Trucks              | - Hose                         | - Snow Vehicles               |
| - Boats, Jet              | - Hot Water Units              | - Steam Units                 |
| - Boats, Prop             | - Ice Cutting Equipment        | - Straw                       |

# SPILL RESPONSE FLOWCHART – BRITISH COLUMBIA

## BC Incident Classification Matrix

Emergency Management BC  
(EMBC)  
**1-800-663-3456**

- all oil spills, produced water spills related to the oil & gas industry including pipeline spills.

Emergency Management BC  
(EMBC)  
**1-800-663-3456**

- substances spilled and reportable qualities are outlined in table on following page (“Special Waste Regulations” 63/88).

- SPILLS MUST BE REPORTED PROMPTLY TO AVOID POSSIBLE PROSECUTION.

## Interpretation

**1** In this regulation:

"**Act**" means the *Environmental Management Act*;

"**PEP**" means the Provincial Emergency Program continued under the *Emergency Program Act*;

"**spill**" means a release or discharge into the environment, not authorized under the Act, of a substance in an amount equal to or greater than the amount listed in Column 2 of the Schedule opposite that substance in Column 1;

"**substance**" means a substance, product, material or other thing listed in Column 1 of the Schedule to this regulation.

[am. B.C. Regs. 321/2004, s. 28 (a) and (b); 220/2006, Sch. s. 3.]

## Report

**2** (1) For the purposes of section 79 (5) of the Act, a person who had possession, charge or control of a substance immediately before its spill shall immediately report the spill to PEP by telephoning 1-800-663-3456.

(2) Where it appears to a person observing a spill that a report under subsection (1) has not been made, he or she shall make the report referred to in this section.

(3) A report under this section shall include, to the extent practical,

- (a) the reporting person's name and telephone number,
- (b) the name and telephone number of the person who caused the spill,
- (c) the location and time of the spill,
- (d) the type and quantity of the substance spilled,
- (e) the cause and effect of the spill,
- (f) details of action taken or proposed to comply with section 3,
- (g) a description of the spill location and of the area surrounding the spill,
- (h) the details of further action contemplated or required,
- (i) the names of agencies on the scene, and
- (j) the names of other persons or agencies advised concerning the spill.

# REPORTABLE LEVELS FOR CERTAIN SUBSTANCES (ENVIRONMENTAL MANAGEMENT ACT)

Where a spill occurs, the person who immediately before the spill had possession, charge or control of the spilled substance shall take all reasonable and practical action, having due regard for the safety of the public and of himself or herself, to stop, contain and minimize the effects of the spill.

## Schedule

[en. B.C. Reg.376/2008.]

### Reportable Levels for Certain Substances

1 In this Schedule:

**"Federal Regulations"** means the Transportation of Dangerous Goods Regulations made under the *Transportation of Dangerous Goods Act (Canada)*;

**"Hazardous Waste Regulation"** means B.C. Reg. 63/88.

Item	Column 1 Substance spilled	Column 2 Specified amount
1	Class 1, Explosives as defined in section 2.9 of the Federal Regulations	Any quantity that could pose a danger to public safety or 50 kg
2	Class 2.1, Flammable Gases, other than natural gas, as defined in section 2.14 (a) of the Federal Regulations	10 kg
3	Class 2.2 Non-Flammable and Non-Toxic Gases as defined in section 2.14 (b) of the Federal Regulations	10 kg
4	Class 2.3, Toxic Gases as defined in section 2.14 (c) of the Federal Regulations	5 kg
5	Class 3, Flammable Liquids as defined in section 2.18 of the Federal Regulations	100 L
6	Class 4, Flammable Solids as defined in section 2.20 of the Federal Regulations	25 kg
7	Class 5.1, Oxidizing Substances as defined in section 2.24 (a) of the Federal Regulations	50 kg or 50 L

8	Class 5.2, Organic Peroxides as defined in section 2.24 (b) of the Federal Regulations	1 kg or 1 L
9	Class 6.1, Toxic Substances as defined in section 2.27 (a) of the Federal Regulations	5 kg or 5 L
10	Class 6.2, Infectious Substances as defined in section 2.27 (b) of the Federal Regulations	1 kg or 1 L, or less if the waste poses a danger to public safety or the environment
11	Class 7, Radioactive Materials as defined in section 2.37 of the Federal Regulations	Any quantity that could pose a danger to public safety and an emission level greater than the emission level established in section 20 of the "Packaging and Transport of Nuclear Substances Regulations"
12	Class 8, Corrosives as defined in section 2.40 of the Federal Regulations	5 kg or 5 L
13	Class 9, Miscellaneous Products, Substances or Organisms as defined in section 2.43 of the Federal Regulations	25 kg or 25 L
14	waste containing dioxin as defined in section 1 of the Hazardous Waste Regulation	1 kg or 1 L, or less if the waste poses a danger to public safety or the environment
15	leachable toxic waste as defined in section 1 of the Hazardous Waste Regulation	25 kg or 25 L
16	waste containing polycyclic aromatic hydrocarbons as defined in section 1 of the hazardous Waste Regulation	5 kg or 5 L
17	waste asbestos as defined in section 1 of the Hazardous Waste Regulation	50 kg
18	waste oil as defined in section 1 of the Hazardous Waste Regulation	100 L
19	waste containing a pest control product as defined in section 1 of the Hazardous Waste Regulation	5 kg or 5 L
20	PCB Wastes as defined in section 1 of the Hazardous Waste Regulation	25 kg or 25 L
21	waste containing tetrachloroethylene as defined in	50 kg or 50 L

	section 1 of the Hazardous Waste Regulation	
22	biomedical waste as defined in section 1 of the Hazardous Waste Regulation	1 kg or 1 L, or less if the waste poses a danger to public safety or the environment
23	A hazardous waste as defined in section 1 of the Hazardous Waste Regulation and not covered under items 1 – 22	25 kg or 25 L
24	A substance, not covered by items 1 to 23, that can cause pollution	200 kg or 200 L
25	Natural gas	10 kg, if there is a breakage in a pipeline or fitting operated above 100 psi that results in a sudden and uncontrolled release of natural gas

[Provisions of the [Environmental Management Act](#), S.B.C. 2003, c. 53, relevant to the enactment of this regulation: sections 53, 79 (5) and 92]

## BRITISH COLUMBIA PROVINCIAL NUMBERS

Emergency Management BC - Emergency Coordination Centre ..... **1-800-663-3456**  
(will arrange emergency services as required if local authorities are unknown) ..... **(24 hrs)**

Inquiry B.C. - To find numbers for government departments ..... **1-800-663-7867**  
(when calling within B.C.)

## SPILL REPORTING CRITERIA

Where the permit holder holds or maintains rights, the permit holder must report to the BC Oil and Gas Commission, all spills of materials as identified below:

- A spill or release of any amount of materials which impacts water ways
- Hydrocarbons; 100 litres where the hydrocarbon contains no toxic materials and does not impact water ways
- Produced/salt water; 200 litres where the fluid contains no toxic materials
- Fresh water; 10,000 litres
- Drilling or invert mud; 100 litres
- Sour Natural gas; 10Kg or 15 m<sup>3</sup> by volume where operating pressure is >100 PSI
- Condensate; 100 litres
- Any fluid including hydrocarbons, drilling fluids, invert mud, effluent, emulsions, etc. which contain toxic substances; 25 litres

Please refer to the BC Environmental Management Act; Spill Reporting Regulations, Even though some spills are not reportable, the requirement to clean up the spill is still mandatory.

Spills of reportable amounts which occur in a secondary containment are still a reportable incident.

## **OTHER REPORTABLE INCIDENTS**

The Commission's Incident Classification Matrix is designed to assist permit holders in determining which incidents must be reported. However, some incidents, which do occur, may not meet the criteria outlined in the Incident Classification Matrix but still require notification to the Commission as a minor notification. These include the following:

- Spills or release of hazardous substances which are not provincially regulated, such as radioactive substances;
- Major damage to oil and gas roads or road structures;
- Drilling kicks when any one of the following occur:
  - o pit gain of 3 m<sup>3</sup> or greater
  - o casing pressure 85% of MA
  - o 50% out of hole when kicked
  - o well taking fluid (LC)
  - o associated spill
  - o general situation deterioration, i.e. leaks, equipment failure, unable to circulate, etc.
- Pipeline incidents, such as spills during construction phase, exposed pipe caused by flooding, pipeline over pressure, failure (without release) of any pressure control or ESD device during operations, and;
- Security related issues which are relatively minor; such information may be required for tracking and monitoring purposes only.

## **INCIDENT REPORTING INSTRUCTIONS**

The Incident Classification Matrix is designed for use as a tool for determining the severity of an incident. The ranking system includes quantitative analyses of 1) the consequence(s) as a result of the incident, and 2) the likelihood of the incident escalating.

1. Complete the scoring by starting at the top and continue down. Check off any one box for consequence and probability.
2. Add the applicable scores from each section. Note if none of the check box items apply in either section, the rank should be recorded as "zero".
3. Compare the total score with the classification section and assign the corresponding level.

Updated: 31-July-2014 Effective: 31-July-2014

## MINOR INCIDENT

- The permit holder must report the minor incident to the Commission within **24 hours** by electronic submission through the Online Minor Incident Reporting System, operated through KERMIT.
- If the minor incident involves a spill, EMBC must also be called at 1-800-663-3456 for the Ministry of Environment to be notified.
- The incident must be reported by electronic submission by the permit holder incident representative. A copy of the Form A: Minor Incident Notification Form and the Incident Classification Matrix can be found on the Emergency Response and Safety section of the Commission's website to help the permit holder gather the information required before entering it online. The matrix and any photos or any other relevant documentation can be attached to the online submission.

## LEVEL 1, 2, OR 3 EMERGENCY

If the incident receives a score of Level 1, 2, or 3, it must be reported **immediately (within 1 hour)** to the Commission's incident reporting line (EMBC 1-800-663-3456).

## OIL AND GAS ROAD CLOSURES

In Emergency situations, permit holders must phone the Commission's 24 hour Incident Reporting line to notify the Commission of needed emergency oil and gas road closures.

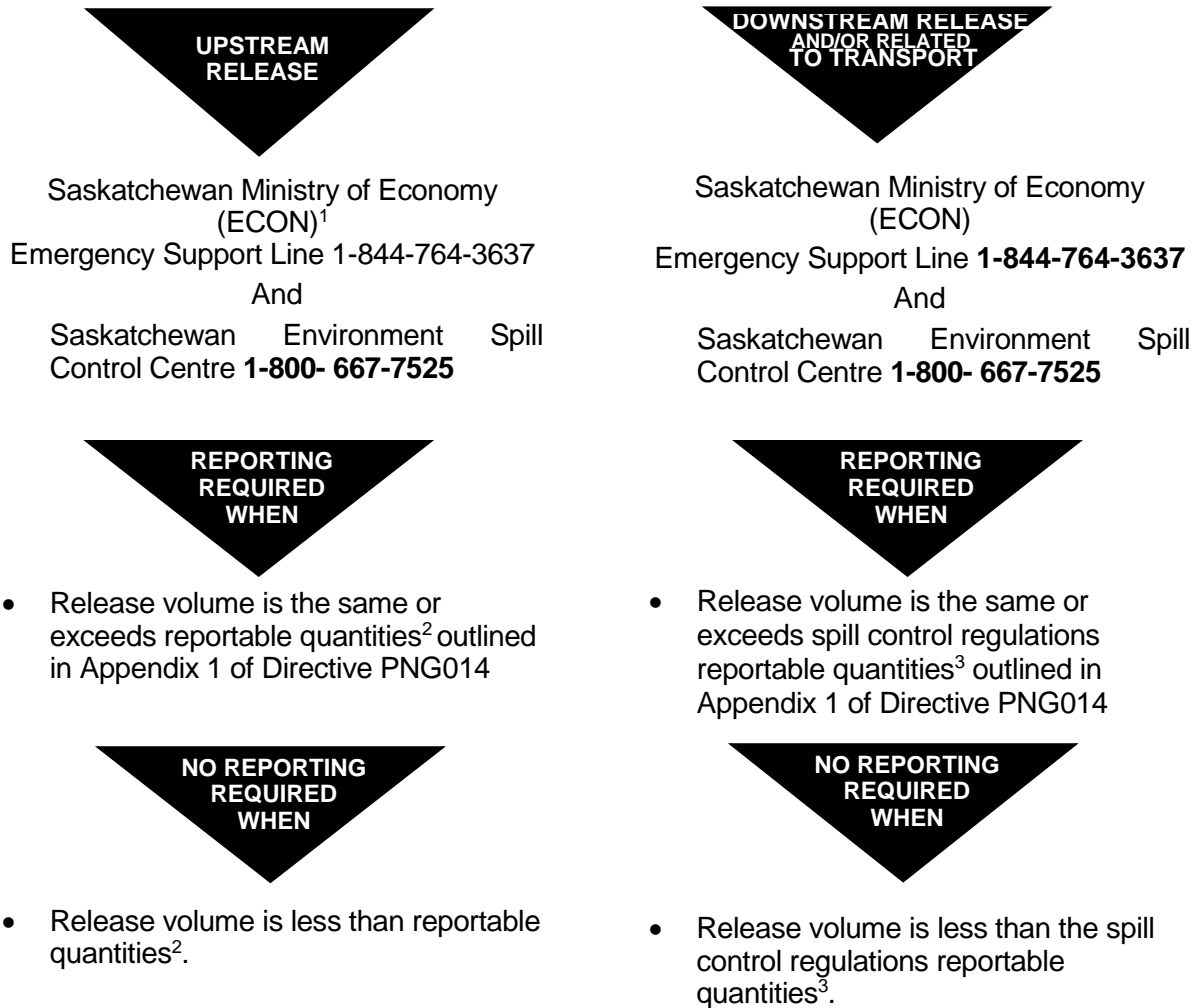

## PERMIT HOLDER POST INCIDENT REPORT

[The Form D: Permit Holder Post Incident Report Form](#) must be submitted by the permit holder to the Commission within 60 days for:

1. Any Level 1, 2 or 3 emergency incident: complete Part A-P; or
2. Any pipeline incident (including minor incident): complete Part A-U; or
3. Upon request by the Commission.

This report and accompanying documentation can be found on the Commission's website under Emergency Response and Planning and must be emailed electronically to [EMP@bcogc.ca](mailto:EMP@bcogc.ca)

# SPILL REPORTING FLOWCHART — SASKATCHEWAN

(1) Spills of petroleum, natural gas or salt water directly associated with the construction or operation of petroleum or natural gas; or flowlines and pipelines for the gathering and distribution of petroleum and natural gas, other than flowlines or pipelines located on property for the purpose of delivering petroleum or natural gas to, or gathering it from, other facilities located on that property.

- For further information on upstream releases, or area office contact numbers, contact Saskatchewan Ministry of Economy, Ken Kowal: Director, Field Operations at (306) 798-3085.

(2) Saskatchewan Ministry of Economy (ECON) requires Initial Incident Notification in IRIS within 5 days of the discovery of an incident, and a Detailed Incident Report within 90 days of the submission of the Initial Incident Report. Refer to Incident Reporting Requirements, [Directive PNG014](#). Refer to the Incident Reporting Flow Chart in Appendix 3.

(3) Refer to Appendix Table from the [Saskatchewan Environment Spill Control Regulations](#).

- When releases meet dangerous occurrence criteria as stipulated with the Transportation of Dangerous Goods Regulations, the party is required to adhere to the 3 day reporting requirement.
- For further information on downstream releases, contact the Saskatchewan Environment Spill Control Centre **1-800- 667-7525**.

This flowchart is compiled from information received from government departments regarding reporting of types of spills common to the oil and gas industry. All persons utilizing this flowchart are reminded it has no legislative sanction and that the Saskatchewan Environment Spill Control Regulations, the Oil and Gas Conservation Regulations and the Transportation of Dangerous Goods Regulations should be consulted for all purposes of interpretation and application of the law.
